Video Live

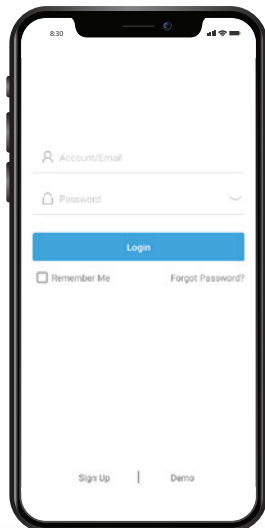

Falcon-i

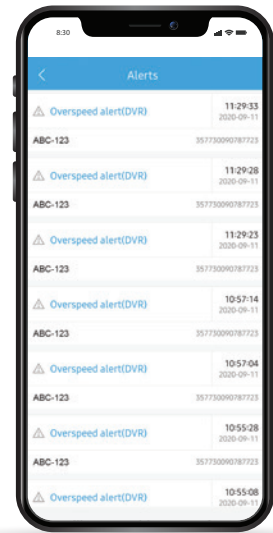

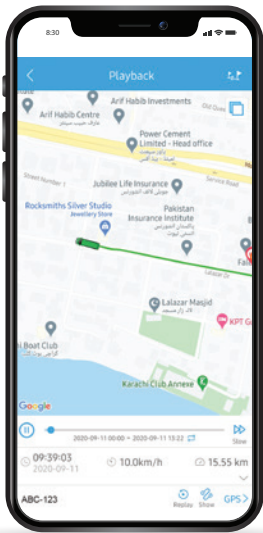

Go on a journey

Falcon-i Video Live empowers you to see what your car sees wherever it goes. Matched up with Falcon-i Standard, Plus, or Fleet Control, you can now be a part of every journey your car takes

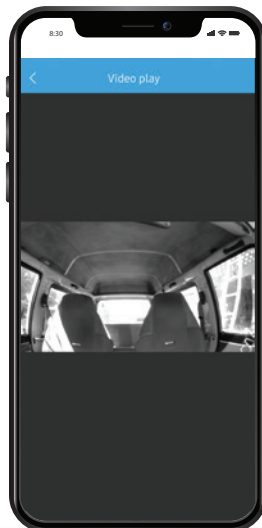

Gain all the evidence remotely

Has your vehicle been in an accident? Get the full view from Video Live and ensure your insurance claims are protected. Spotted a rash driver? Gain real-time data and safeguard road safety.

Security for the whole family

Video Live takes care of your entire family, from young children strapped in their car seats to young adults driving the car – we have got you covered. Now ensure your family is always safe as you remotely monitor their whereabouts and driving skills.

Record an entire road trip

Taking a scenic trip outside the city or enjoying a drive around town? Video Live will record it all for you so you can go back in time whenever you like. Make unforgettable journeys last forever!

Speak to your car

With Video Live, you can provide real-time support to the driver by speaking straight to him whenever you like. Providing directions has never been this easy!

Be data driven

Our reports put data insights at your fingertips, allowing you to monitor key performance indicators, go back in time and check the history, all whilst recording your car's entire journey.

A complete end to end solution

Video Live is only one element of how we take care of your vehicle. Match this up with our other products like Logistics Optimiser and Fleet Care and you've got yourself an end to end business solution.

About Falcon-i

As the country's largest privately-owned fleet management company, we've always looked forward. Over the years we've grown, invested in technology and built one of the best teams in the industry. This has helped us build trust amongst 160,000 customers and has allowed us to put over 100 corporate enterprises in control, by providing insights on driver & fleet performance, vehicle usage and diagnostics.

We've always worked to make it easy for our customers to monitor & manage their vehicles, so they can stay focused on what matters to them the most. As a result, we've secured and monitored assets of over US\$2Bn.
